Experience

Websparks / UI&UX Designer

Sep 2019 - Present

UX Research & UI Design

- Conduct researches such as competitive analysis and user interview to understand user needs and pain points.
- Propose areas for improvement and feasible solutions based on the research findings and considerations for existing limitations.
- Create UI elements including icons, vectors, photos, and animations to ensure user engagement.
- Build wireframe and prototype to showcase project ideas and concepts to all stakeholders.
- The capability of quick problem-solving and significant improvement of user experience has earned positive feedbacks from stakeholders.

Project Pitching

- Collaborate with business development team to propose inspiring design in project pitching.
- Successfully attracted and obtained five projects till date.

Project Management

- Work closely with stakeholders, project managers, and developers from conception to early implementation phases.
- Establish timelines and consensus from all parties around product flow, technology limitations, and research goals.
- Achieve product/project milestones by defining UX goals, priorities, and deliverables to meet clients expectations.

Uberprint / Photographer

Jan 2018 - Mar 2018 Intern / Mar 2018 - Jun 2019 freelancer

- In-charge of photo-taking for various events, roving photography, weddings, studios, and photo booths.
- Post-processed photos taken with attention to fine details to ensure quality products that satisfy clients expectations.
- Guided new photographers onboarding to ensure they could be familiar with the work processes quickly.
